What is Racquetball?

Racquetball is a high-speed indoor sport played by two or four players on a rectangular court enclosed with walls, ceilings, and floors that are all part of the playing surface. The game involves hitting a rubber ball with a racquet so that the opponent cannot return it before it bounces twice. The sport is derived from the older game of handball and was invented in the 1950s, quickly gaining popularity worldwide due to its energetic pace and accessibility.

Basic Rules of Racquetball

Understanding the rules of racquetball is essential for beginners to enjoy the game and improve quickly. While the game can seem complex at first, focusing on core principles will help you get started.

Objective of the Game

The main goal is to score points by making a shot that your opponent cannot legally return before the ball bounces twice. The player with the most points at the end of the match wins.

Scoring System

- Points are only scored by the server.
- A typical game is played to 15 points, and matches are often best of three games.
- If the score reaches 14-14, play continues until one player leads by two points.

Serving Rules

- The server must stand within a service zone and hit the ball directly onto the front wall, ensuring it lands past the short line and then clears the short line on the return.
- The serve must be inbounds, and players alternate serves in singles or doubles matches.

Gameplay and Rallies

- After the serve, players take turns hitting the ball against the front wall, with the ball allowed to bounce once on the floor before returning.
- The ball must hit the front wall and land within the boundaries without hitting the ceiling or out-of-bounds areas.
- The rally continues until one player fails to make a legal return, the ball goes out of bounds, or a double bounce occurs.

Equipment Needed for Beginners

Getting the right equipment is crucial for comfort, safety, and performance. Here's what you need to start playing racquetball.
