

ADVICE ON DYING AND LIVING WELL BY TAMING THE MIND Manual

Advice on dying and living well by taming the mind

In the journey of life, understanding how to live fully and face the inevitable end with grace is a profound pursuit. Central to this pursuit is the art of taming the mind. A peaceful, disciplined mind can help us navigate life's challenges, foster genuine happiness, and prepare us for the ultimate transition—death. This guide explores practical advice on living well and dying peacefully by mastering the mind, offering insights rooted in mindfulness, philosophy, and modern psychology.

Understanding the Role of the Mind in Living and Dying

The Mind as the Master of Experience

Our perceptions, emotions, and reactions are primarily shaped by our mind. An untrained mind can lead to suffering, anxiety, and regret, while a well-tamed mind brings clarity, serenity, and acceptance.

The Connection Between Living Well and Dying Well

Living a meaningful life involves mindfulness, compassion, and self-awareness. Equally, facing death with peace requires mental preparation—acceptance, letting go, and inner harmony. Taming the mind bridges these two aspects, enabling us to embrace life fully and approach death with equanimity.

Practical Advice on Taming the Mind for a Better Life and Death

1. Cultivate Mindfulness and Presence

Mindfulness is the practice of paying attention to the present moment without judgment. It helps break the cycle of worry about the future or regret over the past.

- **Practice daily meditation:** Set aside 10-20 minutes to focus on your breath, sensations, or a mantra.
- **Engage in mindful activities:** Eat slowly, walk consciously, or listen attentively.
- **Use reminders:** Place notes or alarms to prompt mindfulness throughout the day.

2. Develop Compassion and Self-Compassion

A compassionate mind fosters inner peace and better relationships, which are vital for a fulfilling life and a peaceful death.

- **Practice loving-kindness meditation:** Send goodwill to yourself and others daily.
- **Forgive and let go:** Release grudges and accept imperfections both in yourself and others.
- **Help others:** Acts of kindness reinforce compassion and purpose.

3. Engage in Reflective Practices

Reflection deepens understanding of life's transient nature and prepares us for death.

- **Contemplate mortality:** Regularly remind yourself of life's impermanence to cultivate appreciation and reduce fear.
- **Practice gratitude:** Keep a gratitude journal to focus on life's blessings.
- **Set intentions:** Clarify your values and goals to live authentically.

4. Manage Emotions Through Acceptance and Detachment

A key aspect of taming the mind involves accepting emotions without being overwhelmed.

- **Recognize emotional patterns:** Notice anger, fear, or sadness without judgment.
- **Practice equanimity:** Cultivate a balanced mind that remains steady amid ups and downs.
- **Use breathing techniques:** Deep breathing helps anchor your emotions and regain calm.

5. Simplify Your Life and Reduce Clutter

A cluttered mind often reflects external chaos. Simplification fosters clarity and peace.

- **Declutter physical spaces:** Clear your environment to promote tranquility.
- **Prioritize meaningful activities:** Focus on what truly matters.
- **Limit distractions:** Reduce unnecessary commitments and digital noise.

6. Embrace Spiritual or Philosophical Practices

Many traditions offer tools to tame the mind and prepare for death.

- **Study spiritual texts:** Reflect on teachings about impermanence and the nature of self.
- **Practice meditation or prayer:** Deepen your connection to your spiritual beliefs.
- **Engage in community:** Join groups that support spiritual growth and shared wisdom.

Preparing for Death: A Mindful Approach

1. Cultivate Acceptance and Letting Go

Acceptance is the cornerstone of peace in dying.

- **Recognize the inevitability of death:** Embrace mortality as part of life's cycle.
- **Practice surrender:** Let go of attachments to outcomes, possessions, and identities.
- **Engage in forgiveness:** Resolve conflicts and reconcile relationships.

2. Engage in End-of-Life Planning

Clear plans reduce anxiety and foster peace.

- **Discuss wishes with loved ones:** Share preferences regarding medical care, spiritual rites, and legacy.
- **Prepare legal documents:** Will, advance directives, and power of attorney.
- **Organize personal belongings:** Decide what to leave behind or donate.

3. Practice Mindful Presence in Final Moments

Being present at the end can bring profound peace.

- **Stay connected with loved ones:** Share your feelings and appreciation.
- **Use meditation or prayer:** Focus on serenity and acceptance.
- **Reflect on your life's journey:** Find meaning in your experiences.

4. Support and Comfort Others

Helping others during their transition can also bring peace to oneself.

- **Offer presence and compassion:** Listen and hold space for loved ones.
- **Share your insights:** Discuss your fears and hopes openly.

- **Embrace community:** Seek spiritual or support groups for guidance.

Integrating the Practice of Taming the Mind into Daily Life

1. Establish a Regular Practice Routine

Consistency deepens mental discipline.

- **Morning meditation:** Set a peaceful tone for the day.
- **Mindful pauses:** Take moments throughout the day to reset your awareness.
- **Evening reflection:** Review your day with kindness and gratitude.

2. Seek Guidance and Support

Learning from teachers, mentors, or communities can enhance your journey.

- **Attend workshops or retreats:** Deepen your understanding of mindfulness and spiritual practices.
- **Read inspiring books:** Draw wisdom from various traditions.
- **Connect with like-minded individuals:** Share experiences and encouragement.

3. Practice Patience and Compassion with Yourself

Mastering the mind is a gradual process.

- **Be gentle:** Recognize setbacks as part of growth.
- **Celebrate progress:** Acknowledge small victories.
- **Maintain curiosity:** Approach your practice with openness and kindness.

Conclusion: The Path to Peaceful Living and Dying

Taming the mind is not a one-time achievement but a lifelong journey. By cultivating mindfulness, compassion, acceptance, and reflection, we can learn to live with intention and face death with serenity. This holistic approach transforms the inevitable into a profound opportunity for growth, peace, and spiritual awakening. Embracing these practices enables us to find joy in the present, reconcile with our mortality, and ultimately, die with dignity and grace.

Remember, the journey of living well and dying peacefully begins with the simple, mindful act of

tending to your mind each day.

Advice on Dying and Living Well by Taming the Mind

In the pursuit of a meaningful life and a peaceful death, one principle consistently emerges across cultures and philosophies: mastering the mind. The idea of "taming the mind" is not merely about suppressing thoughts or emotions but cultivating a mindful awareness that allows us to navigate life's inevitable challenges with grace. As death approaches, a well-tamed mind can bring acceptance, serenity, and clarity, transforming the fear of mortality into an understanding of life's transient beauty. Conversely, during life, a disciplined mind fosters resilience, compassion, and genuine living. This article explores how taming the mind serves as a vital tool in both living well and dying peacefully, offering practical insights rooted in ancient wisdom and modern psychology.

The Central Role of the Mind in Life and Death

Understanding the Mind's Power

The mind—comprising thoughts, emotions, beliefs, and perceptions—is arguably the most influential aspect of our experience. It shapes our reality, influences our health, and determines our emotional well-being. When the mind is restless, anxious, or overwhelmed, life feels chaotic and death seems frightening. When it is calm, centered, and present, life and death become less daunting, and we find meaning in both.

The Fear of Death and the Untrained Mind

Many fears surrounding death stem from the mind's tendency to cling to permanence in an impermanent world. The illusion that we can control or avoid death fuels anxiety and suffering. An untrained mind tends to dwell on regrets, worries, and "what-ifs," which magnify our fear of the inevitable. Conversely, a mind that has been tamed—through mindfulness, acceptance, and insight—can approach mortality with equanimity and even gratitude.

How Taming the Mind Enhances Living Well

Cultivating Mindfulness and Presence

Mindfulness is the practice of paying deliberate attention to the present moment without judgment. It is the cornerstone of taming the mind and has profound effects on quality of life:

- Reduces stress and anxiety: By anchoring ourselves in the present, worries about the past or future diminish.

- Enhances emotional regulation: Mindfulness creates space between stimulus and response, allowing for more thoughtful reactions.
- Improves physical health: Studies link mindfulness with lower blood pressure, improved sleep, and better immune function.
- Fosters gratitude and contentment: Regular practice nurtures appreciation for daily experiences.

Practical tip: Incorporate daily mindfulness exercises such as focused breathing, body scans, or mindful walking to develop greater awareness and calm.

Developing Emotional Resilience

Taming the mind involves recognizing and managing negative emotions rather than suppressing them. Resilient individuals:

- Acknowledge feelings like sadness, anger, or fear without being overwhelmed.
- Cultivate compassion for themselves and others.
- Use setbacks as opportunities for growth.

Practical tip: Practice self-compassion exercises or journaling to process emotions constructively.

Clarifying Values and Living Intentionally

A well-tamed mind helps clarify what truly matters, guiding purposeful living:

- Identify core values and align daily actions accordingly.
- Let go of trivial concerns that distract from meaningful pursuits.
- Build authentic relationships based on empathy and presence.

Practical tip: Regularly reflect on personal goals and values, adjusting behaviors to live more intentionally.

Taming the Mind for a Peaceful Death

Acceptance and Non-Attachment

Approaching death with a tamed mind involves embracing impermanence and cultivating acceptance:

- Recognize death as a natural part of life's cycle, reducing fear.
- Practice non-attachment to possessions, identities, and even life itself.
- Develop a sense of surrender and trust in the process.

Practical tip: Engage in meditative practices that focus on impermanence, such as contemplating the death of the body or the transient nature of thoughts.

Cultivating Compassion and Forgiveness

Peaceful acceptance often arises from a heart unburdened by regrets:

- Extend forgiveness to oneself and others.
- Cultivate compassion for all beings, recognizing shared mortality.
- Engage in acts of kindness and gratitude.

Practical tip: Use guided meditations on compassion or write forgiveness letters to release lingering resentments.

Preparing Practically and Spiritually

In addition to mental preparation:

- Ensure arrangements align with personal values.
- Engage in spiritual or philosophical reflection that offers comfort.
- Seek community support or guidance from spiritual leaders if desired.

Practical tip: Participate in death cafes or discussions about mortality to normalize and demystify the process.

Practical Strategies to Tame the Mind

Meditation and Contemplative Practices

Regular meditation trains the mind to observe thoughts without attachment, fostering tranquility. Techniques include:

- Focused Attention: Concentrating on the breath or a mantra.
- Open Awareness: Observing all thoughts and sensations without judgment.

- Loving-kindness (Metta): Cultivating compassion for oneself and others.

Mindful Lifestyle Choices

- Engage in activities that promote mental clarity, such as yoga, tai chi, or creative pursuits.
- Limit exposure to distressing media or environments.
- Practice gratitude daily to shift focus from scarcity to abundance.

Seeking Guidance and Community

- Join meditation groups or spiritual communities for support.
- Work with mental health professionals trained in mindfulness-based therapies.
- Read and reflect on teachings from wisdom traditions that emphasize acceptance and presence.

The Intersection of Ancient Wisdom and Modern Science

Insights from Buddhist Philosophy

Buddhist teachings emphasize the impermanence of all phenomena and the importance of mindfulness and compassion. Practices such as meditation are designed to tame the restless mind, leading to liberation from suffering and fear?principles equally applicable to facing death.

Psychological Evidence

Modern psychology supports these ancient insights. Mindfulness-based stress reduction (MBSR) and acceptance and commitment therapy (ACT) have demonstrated effectiveness in reducing anxiety about mortality and improving overall well-being.

Neuroplasticity and Mind Training

Research shows that the brain remains capable of change throughout life. Consistent mental training can rewire neural pathways, making the mind more resilient, compassionate, and accepting?qualities essential for both living well and dying peacefully.

Conclusion: The Transformative Power of a Tamed Mind

Taming the mind is not a one-time achievement but an ongoing journey that enriches life and eases the path toward death. It offers a way to cultivate peace amid chaos, clarity amid confusion, and

acceptance amid uncertainty. By developing mindfulness, emotional resilience, and compassion, we empower ourselves to live authentically and face mortality with serenity. Ultimately, the wisdom of taming the mind reveals that living well and dying peacefully are interconnected pursuits, both rooted in the simple yet profound act of cultivating a calm and attentive awareness of the present moment. In mastering the mind, we discover the true essence of a life well-lived and a death embraced with dignity.

Question What are the key principles of living well according to 'Advice on Dying and Living Well by Taming the Mind'? The book emphasizes mindfulness, compassion, acceptance, and cultivating inner peace as essential principles for living a fulfilling life. How does taming the mind contribute to accepting death gracefully? Taming the mind helps reduce fear and attachment, allowing individuals to approach death with equanimity and serenity. What practical techniques does the book suggest for calming the mind? The book recommends meditation, deep breathing exercises, mindfulness practices, and self-awareness to cultivate mental calmness. How can understanding impermanence help us live better lives? Recognizing impermanence encourages us to cherish each moment, reduce attachment, and live with greater presence and gratitude. What role does compassion play in the process of dying and living well? Compassion fosters connection, reduces suffering, and promotes acceptance for oneself and others during life and at the time of death. Are there specific meditative practices highlighted in the book to prepare for death? Yes, practices such as death contemplation, loving-kindness meditation, and visualization are discussed as ways to prepare emotionally and spiritually. How can taming the mind help in overcoming fear of death? By developing mindfulness and understanding the nature of the mind, individuals can transcend fear and approach death with peace and clarity. What advice does the book offer for living a meaningful life? It encourages mindfulness, serving others, cultivating gratitude, and aligning actions with inner values to create a meaningful existence. Can the teachings in the book be applied across different cultures and spiritual backgrounds? Yes, the universal principles of mindfulness, compassion, and acceptance are applicable and beneficial regardless of cultural or spiritual context.

Living and non living things multiple choice

living and non living things multiple choice questions are a common way to assess understanding of the fundamental differences between what constitutes living organisms and inanimate objects. These questions are widely used in school examinations, quizzes, and educational activities to help students grasp essential biological concepts and develop observational skills. Recognizing the characteristics that distinguish living from non-living things is crucial for

students studying biology, environmental science, and general science education. In this article, we will explore the differences between living and non-living things through multiple-choice questions, their importance in education, and tips on how to approach such questions effectively.

Understanding Living and Non-Living Things

Before diving into multiple-choice questions, it's essential to understand the basic definitions and characteristics that differentiate living and non-living things.

What Are Living Things?

Living things, also known as organisms, are entities that exhibit certain biological processes. They are capable of growth, reproduction, response to stimuli, metabolism, and adaptation over time. Examples include humans, animals, plants, fungi, and microorganisms.

Characteristics of living things:

- **Growth and Development:** Living things grow in size and develop features over time.
- **Reproduction:** They produce new individuals of the same species.
- **Response to Stimuli:** They react to environmental changes, such as light, sound, or touch.
- **Metabolism:** They carry out chemical reactions to produce energy.
- **Homeostasis:** They maintain a stable internal environment.
- **Adaptation:** They evolve over generations to better survive in their environment.

What Are Non-Living Things?

Non-living things are objects or substances that do not possess the biological processes characteristic of living organisms. They do not grow, reproduce, respond to stimuli, or undergo metabolism.

Examples include:

- Rocks
- Water
- Air
- Furniture
- Buildings
- Plastic objects

Characteristics of non-living things:

- Do not grow or develop
- Do not reproduce
- Do not respond actively to stimuli
- Are not capable of metabolism
- Maintain a fixed composition

Common Multiple Choice Questions on Living and Non-Living Things

Multiple choice questions (MCQs) are an effective way to test knowledge in a quick and efficient manner. Here are some typical MCQs that can help reinforce understanding.

Sample Questions and Answers

- **Which of the following is a non-living thing?**

- a) Tree
- b) Dog
- c) Rock
- d) Fish

Answer: c) Rock

- **Which characteristic is common to all living things?**

- a) Responding to stimuli
- b) Having a backbone
- c) Being made of plastic
- d) Being found in water

Answer: a) Responding to stimuli

- **Which of these is NOT a characteristic of living organisms?**

- a) Growth
- b) Reproduction
- c) Movement
- d) Inability to respond to environment

Answer: d) Inability to respond to environment

- **Which of the following is an example of a living thing?**

- a) Air
- b) Mushroom
- c) Water
- d) Plastic bag

Answer: b) Mushroom

- **Which statement best describes non-living things?**

- a) They can reproduce
- b) They grow and develop
- c) They do not respond to stimuli
- d) They carry out life processes

Answer: c) They do not respond to stimuli

How to Approach Multiple Choice Questions on Living and Non-Living Things

Approaching MCQs effectively requires understanding the concepts and applying logical reasoning. Here are some tips:

1. Read the Question Carefully

Pay close attention to what the question asks. Look for keywords such as "which," "all," "except," or "most."

2. Recall Key Characteristics

Think about the defining features of living and non-living things. Remember that characteristics like growth, reproduction, response, and metabolism are exclusive to living things.

3. Eliminate Incorrect Options

Narrow down choices by ruling out options that do not fit the criteria. For example, if an option clearly lacks the ability to reproduce or respond, it's likely non-living.

4. Be Wary of Tricky Questions

Some questions may contain options that seem similar. Carefully analyze each choice, and consider real-world examples to guide your answer.

5. Use Examples to Clarify

Relate options to familiar objects or organisms. For instance, if an option is "a plant," remember that plants are living organisms.

Importance of Differentiating Living and Non-Living Things in Education

Understanding the difference between living and non-living things is fundamental in science education for several reasons:

- **Foundation of Biological Science:** It helps students comprehend basic biological concepts and the classification of organisms.
- **Environmental Awareness:** Recognizing living and non-living components of ecosystems fosters environmental consciousness.
- **Scientific Observation:** It enhances skills in observation and critical thinking.
- **Preparation for Advanced Topics:** Concepts learned here form the basis for studying ecology, physiology, and evolution.

Incorporating multiple-choice questions into lessons encourages active participation, reinforces learning, and helps teachers assess students' understanding effectively.

Conclusion

Living and non-living things multiple choice questions serve as an essential tool in education to reinforce understanding of fundamental biological concepts. By recognizing the key differences—such as growth, reproduction, response to stimuli, and metabolism—students can better classify objects and organisms they encounter daily. Preparing for such questions involves understanding characteristics, practicing sample questions, and applying logical reasoning. Whether in classroom quizzes, competitive exams, or self-assessment, mastering these concepts ensures a solid foundation in science education and fosters curiosity about the natural world.

Remember: Always analyze each option carefully, recall the main features of living and non-living things, and relate questions to real-world examples for best results.

Living and Non-Living Things Multiple Choice: An In-Depth Exploration

Understanding the differences between living and non-living things is fundamental in the study of biology and environmental sciences. This knowledge helps us classify the myriad objects and organisms we encounter daily, fostering a deeper appreciation of the natural world. Multiple-choice questions (MCQs) are a common assessment tool used to evaluate comprehension of these concepts. In this article, we delve into the core characteristics that distinguish living from non-living things, explore typical MCQ formats, and provide insights on how to approach such questions effectively.

The Significance of Differentiating Living and Non-Living Things

Before exploring the mechanics of multiple-choice questions, it's essential to grasp why distinguishing between living and non-living entities matters. This understanding forms the foundation for various scientific disciplines, including biology, ecology, medicine, and environmental science.

- **Biological Classification:** Organisms are categorized based on their characteristics, aiding in scientific naming and study.
- **Environmental Impact:** Recognizing which objects or substances are living or non-living influences conservation efforts and ecological management.
- **Daily Life Applications:** From understanding household objects to recognizing natural phenomena, this knowledge informs everyday decisions.

Fundamental Characteristics of Living Things

Living things, also known as organisms, exhibit specific features that set them apart from non-living objects. Recognizing these features is crucial for answering MCQs accurately.

- Growth and Development

Living organisms grow and develop over time, increasing in size and undergoing various structural changes. For example, a seed germinating into a plant exemplifies growth and development.

- Reproduction

Living things have the ability to reproduce, creating new individuals of the same species. This can occur sexually (involving two parents) or asexually (single parent).

- Response to Stimuli

Organisms respond to environmental stimuli such as light, temperature, or touch. For instance, plants bend towards sunlight, and animals react to danger.

- Metabolism

Living entities carry out metabolic processes, involving chemical reactions that sustain life, such as respiration and digestion.

- Homeostasis

Maintaining a stable internal environment, or homeostasis, is characteristic of living organisms. Humans regulate body temperature, for example.

- Cellular Structure

All living things are made up of one or more cells, which are the basic units of life.

- Adaptation to Environment

Over generations, living organisms adapt to their surroundings through evolutionary changes.

Characteristics of Non-Living Things

Non-living objects do not possess the features listed above. They do not grow, reproduce, respond to stimuli in the biological sense, or undergo metabolic processes.

Key Features of Non-Living Things:

- Lack of Cellular Structure: They are not made up of cells.
- No Growth or Development: They do not grow or change over time unless physically altered.
- No Reproduction or Metabolism: They do not reproduce or carry out metabolic reactions.
- Inability to Respond to Stimuli: They do not respond to environmental changes biologically.
- Inanimate Nature: Examples include rocks, water, air, and man-made objects like chairs and buildings.

Common Multiple Choice Question Formats on Living and Non-Living Things

MCQs are designed to test knowledge, understanding, and application of concepts related to living and non-living things. Here are typical formats and how to approach them.

- Identification Questions

These ask students to identify whether an object or organism is living or non-living.

Example:

Which of the following is a living thing?

a) Rock

b) Tree

c) Water

d) Air

Correct Answer: b) Tree

Tip: Focus on the features like growth, reproduction, and cellular structure to distinguish living from non-living options.

- Statement-Based Questions

These present statements about characteristics, requiring the test-taker to judge their truthfulness.

Example:

Which of the following statements is true?

a) A car can grow and reproduce.

b) A fish responds to touch and can reproduce.

c) A book responds to stimuli.

d) A mountain can carry out respiration.

Correct Answer: b) A fish responds to touch and can reproduce.

Tip: Remember, only living things can perform biological functions like response and reproduction.

- Application and Scenario Questions

These involve applying knowledge to real-life situations or hypothetical scenarios.

Example:

An organism is observed to respond to light, grow over time, and reproduce. Which category does it belong to?

a) Non-living object

b) Living organism

c) Man-made object

d) Non-living natural object

Correct Answer: b) Living organism

Tip: Use the key characteristics to analyze the scenario rather than relying solely on appearance.

- True or False Questions

Quick assessments of understanding.

Example:

All non-living things are made up of cells. (True/False)

Answer: False

Strategies for Answering Multiple Choice Questions Effectively

To excel in MCQs on living and non-living things, consider the following strategies:

- Read Each Question Carefully: Pay attention to keywords like "always," "never," or "reproduce."
- Eliminate Clearly Wrong Options: Narrow down choices to improve chances of selecting the correct answer.
- Recall Key Characteristics: Use your knowledge of the features that define living and non-living entities.
- Look for Clues in the Wording: Sometimes the phrasing hints at the correct answer.
- Practice Regularly: Familiarity with common question types boosts confidence and accuracy.

Sample Multiple Choice Questions with Explanations

Here are some sample MCQs to test your understanding:

- Which of the following is NOT a characteristic of living things?

- a) Growth
- b) Response to stimuli
- c) Inability to move
- d) Reproduction

Answer: c) Inability to move

Explanation: While many living things can move, some, like plants, do not move freely. However, the key point is that movement is a common characteristic, and inability to move in itself is not a hallmark of non-living things.

- A rock is an example of a:

- a) Living thing
- b) Non-living thing
- c) Dead organism

d) Reproducing organism

Answer: b) Non-living thing

Explanation: Rocks do not grow, reproduce, respond biologically, or metabolize.

- Which feature is shared by both living and non-living things?

a) Respond to stimuli

b) Made up of cells

c) Can reproduce

d) Can grow

Answer: a) Respond to stimuli

Explanation: Non-living things can respond to stimuli in a physical or chemical way (e.g., a mirror reflecting light). However, biological response is characteristic of living things.

The Educational Importance of Understanding Living and Non-Living Things

Mastering the distinctions through MCQs and related exercises enhances scientific literacy. It allows students and enthusiasts to:

- Better understand ecosystems and biodiversity.
- Recognize natural phenomena versus man-made objects.
- Develop critical thinking skills by analyzing characteristics rather than superficial appearances.
- Prepare effectively for exams and assessments.

Conclusion

Distinguishing between living and non-living things is more than an academic exercise; it is a window into understanding the natural world. Multiple-choice questions serve as an accessible means to test and reinforce this knowledge, emphasizing key characteristics such as growth, reproduction, response to stimuli, and cellular structure. By familiarizing oneself with these features and practicing various question formats, learners can confidently navigate the concepts that underpin biology and environmental science.

Remember, the core difference lies in the presence of life processes. Living things grow, reproduce, respond, and adapt?non-living things do not. Recognizing these fundamental traits is essential, whether you're answering quiz questions or simply marveling at the complexity of nature around you.

QuestionAnswer Which of the following is a living thing? A plant Which characteristic is NOT typical of living things? They do not grow Which of these is an example of a non-living thing? A rock What do living things need to survive? Food, water, and air Which of the following is NOT a living thing? A chair Which characteristic helps distinguish living things from non-living things? Living things can grow and reproduce Which of the following is a non-living thing? A bicycle Which of these is a non-living object? A computer Living things can do which of the following? Carry out life processes like growth and movement Which of the following is a non-living thing that can be found in nature? A mountain
