What is Forex Trading?

The forex market operates 24 hours a day, five days a week, making it highly flexible and accessible to traders worldwide.

Unlike stock markets, the forex market is decentralized, meaning there is no central exchange. Instead, transactions occur over-the-counter (OTC) through a network of banks, brokers, and financial institutions. This decentralized nature provides immense liquidity?trillions of dollars are traded daily?enabling traders to enter and exit positions with minimal price impact.

Key Components of Forex Trading

- **Currency Pairs:** Forex trading involves currency pairs, such as EUR/USD, GBP/JPY, or USD/JPY. The first currency is the base currency, and the second is the quote currency. The price reflects how much of the quote currency is needed to buy one unit of the base currency.
- **Bid and Ask Price:** The bid is the price at which buyers are willing to purchase, while the ask is the price sellers are willing to accept. The difference is called the spread.
- **Leverage:** Many brokers offer leverage, allowing traders to control larger positions with a smaller amount of capital. While leverage can amplify gains, it also increases potential losses.
- **Pips:** The smallest price move in a currency pair, usually 0.0001 for most pairs, representing one basis point.
