| Subject | Suggested Study Duration (Weeks) | Rationale |

|-----|-----|-----|

| Engineering Mathematics | 3 | Fundamental for problem-solving, high scoring |

| Structural Engineering | 5 | Major portion of questions, requires conceptual clarity|

| Geotechnical Engineering | 3 | Critical soil mechanics concepts and calculations |

| Water Resources Engineering| 2 | Focused study on hydraulics and water management |

| Environmental Engineering | 2 | Core treatment processes and pollution control |

| Transportation Engineering | 2 | Design principles and traffic management |

| Construction Management | 1 | Project planning, scheduling, and cost estimation |

This plan can be adjusted based on individual strengths and weaknesses.
