Types of Fish

There are many different types of fish. They can be broadly divided into two main groups:

- **Jawless Fish:** These are some of the earliest fish, like lampreys and hagfish. They don't have jaws and usually have soft, jelly-like bodies.
- **Jawed Fish:** Most fish we see today belong to this group. They have jaws, scales, and fins. Examples include sharks, goldfish, and tuna.

Where Do Fish Live?

Freshwater Fish

Freshwater fish live in rivers, lakes, and ponds. They usually have adaptations that help them survive in water that has a low salt content. Examples include:
