Sourdough Bread Baking

Sourdough is a farmhouse classic, relying on wild yeasts and bacteria to leaven bread naturally.

Basic Process:

- Create a sourdough starter with flour and water.
- Feed the starter regularly, cultivating wild microbes from the environment.
- Mix the starter with flour, water, and salt to make dough.
- Let the dough ferment slowly, often overnight.

- Shape and proof the bread before baking at high temperature.

Tips:

- Use rustic, whole-grain flours for flavor and microbial diversity.
- Maintain a consistent feeding schedule.
- Develop your starter over several weeks for optimal flavor.

Fermentation of Dairy: Farmhouse Yogurt and Cheese

Dairy fermentation transforms milk into yogurt, cheese, and kefir, enriching the farmstead diet.

Yogurt:

- Heat milk to about 180°F to kill unwanted bacteria.
- Cool to 110°F and add a small amount of existing yogurt as a starter.
- Keep warm for 4-8 hours until thickened.

Cheese:

- Use raw or pasteurized milk.
- Add natural rennet or fermentation cultures.
